25X1A

Dear Dan:

This proposal covers the estimated costs of spare parts and fabricated components to be procured and stocked in our plant for the repair and retrofit of Systems 1 and 3 for Requirement No. Three.

The establishment and field operation of these systems over a period of time has provided valuable maintenance information which is reflected in these proposed lists of factory spares. Based upon this experience, we are recommending fabricating and stocking completed capsule assemblies for the repair of the System 3 etched circuit boards. This procedure will permit the more rapid repair and return to the field of System 3's.

The enclosed exhibits provide the basis for the cost estimate. Exhibit A covers the System 1 components, and Exhibit B, the System 3 components. We propose, however, to exercise our discretion in the specific parts and quantities actually purchased, but not to increase the over-all cost without additional authorization from you.

The estimated cost of Exhibit A, System 1 parts, is \$40,763, and the estimated cost of Exhibit B, System 3 parts, is \$59,301. The total estimated cost of both lists is \$100,064, and the fixed fee of 8.25% computed on that amount is \$8,255. The total estimated cost including fixed fee is \$108,319.

Sincerely,

Dean

STATEMENT OF WORK

STOCK OF SYSTEM 1 AND 3 BONDED SPARE PARTS

FOR CONTRACTOR REPAIR AND RETROFIT

The Contractor proposes to provide the labor, facilities and materials necessary to perform the following work:

1. Procure, inspect and store a stock of bonded spare parts and fabricated components in general conformance with the accompanying list, Exhibit A, to be used in the repair and retrofit of System 1 equipment.
2. Procure, inspect and store a stock of bonded spare parts and fabricated components in general conformance with the accompanying list, Exhibit B, to be used in the repair and retrofit of System 3 equipment.
